

MTK®

SPARE PARTS OF EARTHMOVING MACHINES

In 2002, MTK Makina was established as a domestic manufacturer of earthmoving machineries' spare parts aiming at satisfying the market needs inside of Turkey. By the beginning of the third millennium, MTK Makina has witnessed a turning point in the growth of its factors of production and technical processes which have allowed us to expand and compete within the international market with our scope focus on our first rate quality standards. MTK Makina produces Komatsu Dozer and Grader, Mitsubishi Grader spare parts and exports the goods to more than 50 countries.

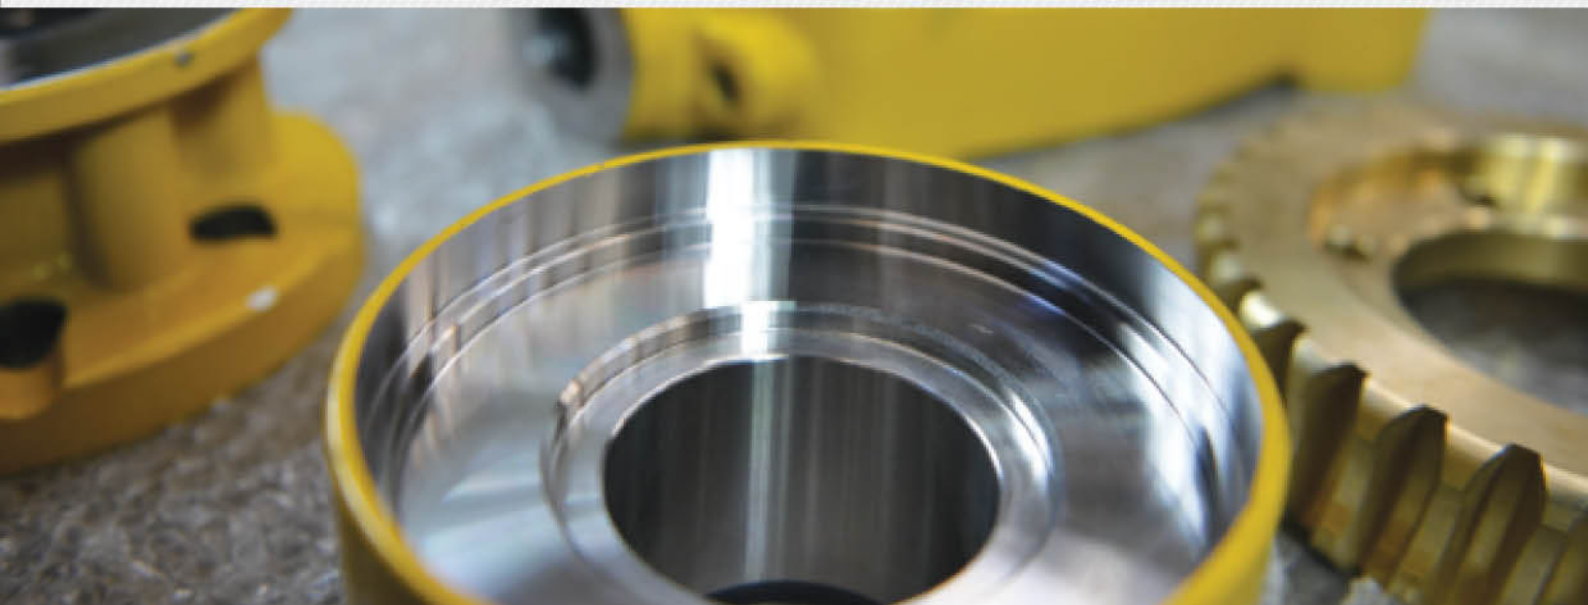

MTK Makina manufactures its products with various kinds of tool and loom such as Vertical Machining Center, CNC Lathe, Drilling Machine, Universal Turning Machine, Profile Grinding Machine, Gear Hobbing Machine, Welding Machine and Milling Machine.

Our activities in the field of construction equipment spare parts have been continuing since 2002 and our company has adopted customer satisfaction and honesty as a principle and it is a constantly growing and developing company in line with this principle.

Our quality standards with ISO 9001:2015 certified are applied from enquiry stage to delivery and post-delivery stage.

We envision MTK Makina as the leader in providing the high quality replacement parts globally. We don't believe that individual growth exists, we believe that growing can be realized with the same level of growth all our stakeholder.

Our mission is providing our market with premium quality replacement parts aligned with the international standards that can meet our customers' expectations and maintain their long term satisfactions while using eco-friendly factors of production.
